## **DETAILED ACTION**

### ***Status of the Claims***

The Amendment and the CRF and paper form of the Sequence listing filed Oct. 22, 2001 (Paper No. 8) have been entered. The Sequence Listing is considered in compliance with the sequence rules.

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-19, drawn to a method for maintaining the quality of an aqueous preparation of thrombomodulin during storage and transportation and a preparation of thrombomodulin, classified in class 424, subclass 94.1 .

Group II, claim(s) 20-21, drawn to a method for maintaining the concentration of a soluble thrombomodulin in blood by administering a soluble thrombomodulin subcutaneously or intramuscularly, classified in class 514, subclass 2.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of Group I is maintaining the quality of an aqueous injection solution of thrombomodulin during storage and transportation while the special technical feature of Group II is a method of treatment to maintain soluble thrombomodulin in the blood. Since the special technical feature of Group I is not present in the Group II invention being claimed and the special technical feature of the Group II invention is not present in the Group I invention being claimed, unity of invention is lacking.

Art Unit: 1653

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
